

SPAWAR Communications Antennas Services and Support

The Communications Antennas Services and Support contract vehicle supports the SPAWAR Systems Center (SPAWARSYSCEN) Net-centric Systems Engineering and Integration Department in its role as the In-Service Engineering Agent (ISEA) and Technical Manager (TM) for all communication antennas within the range of 2 MHz through 400 MHz. Services required by this contract will assist SPAWARSYSCEN Atlantic to provide engineering, installation planning and equipment/system fabrication, grooming/de-grooming, testing and repair/refurbishment, technical documentation, lifecycle maintenance, Electromagnetic Compatibility/Electromagnetic Interference (EMC/EMI) plans, surveys, and corrective actions for electronic/communications system(s)/equipment for SPAWAR and PEOS, PMW 170, NAVSEA and PEOS, USCG, NAVICP, and all ships and foreign military sales. Work under the contract principally falls in the areas of design, engineering and technical support, groom/de-groom antennas and communications equipment, test and evaluation, training support, ISEA services, and program management.
